

Eurotech Group Plc, Exmouth, UK places orders with Viking test Ltd

Eurotech, one of Europe's largest and most prominent PCB manufacturers are a full service provider offering small series to large quantity orders manufactured in their UK facility in Exmouth Devon or sourced from their select approved vendors in Asia.

In January 2010 Eurotech will be installing a new Develop-Etch-Strip line, New Micro Etch line, new vertical De-smear line and new drill and routing machines all supplied from Viking test.

The wet process lines are considered some of the finest available and can handle thin cores down to 0.05mm thickness and up to 5.0mm alike. The lines have been designed with the environment in mind and have many advanced features that will save power and increase running efficiency All pumps and motors have been selected to give the best efficiency and tank chambers are manufactured from a specially designed material that will decrease heat consumption and save power. Spray bars have a unique quick release design to minimize operator maintenance time and glass tops are double layer to further save heat loss.

Drilling machines will be equipped with a 200k RPM spindle that can drill sub 0.1mm holes and utilizes the latest S&M 84.00 controller. The system also has BDD (Broken Drill Detection) LTC (Laser Tool Check) and Z axis control for machining buried and blind vias.

About Eurotech Group Plc

The Eurotech Group is one of the leading names in printed circuit board (PCB) technology and microelectronics. Our customer-driven approach to business has seen Eurotech grow to become a significant supplier to blue-chip electronics firms across the globe. They rely on Eurotech's capability to provide high-end products and services that meet their tightest deadlines, broadest technology requirements and highest quality tolerances. The Eurotech Group plc operates a dedicated PCB manufacturing site in the UK, and Along with their close association with three offshore manufacturing plants in Asia, Eurotech can provide a complete range of microelectronics products and services, a dynamic response and highly specific solutions to their customers' needs. www.eurotech-group.co.uk
